ABOUT ME

Chemistry Undergraduate with a proven track record of two years of hands-on research experience in materials synthesis and optimization, specifically involving formamidine-rich perovskites and inorganic compounds. Demonstrated ability to execute and present independent scientific inquiry through roles at Case Western Reserve University and Konkuk University. Seeking a PhD program to apply a strong academic foundation and technical expertise toward advanced doctoral research in chemistry.

EDUCATION

Case Western Reserve University | 08/2022 – 05/2026 (expected)

BS, Chemistry

WORK EXPERIENCE

Department of Chemistry, CWRU, Arts and Science | 08/2024 – present

Undergraduate Lab Assistant (Advisor: Clemens Burda, Hamza Shaili)

- Assisted synthesizing Lead-free perovskite nano-crystals / micro-crystals
- Assisted synthesizing Formamidine-rich perovskites
- Analyzed absorption / emission peaks and quantum yield of synthesized products
- Assisted formulating graphs of absorption / emission peaks

Department of Chemistry, Konkuk University, South Korea | 05/2024 – 08/2024

Summer Research Intern (Advisor: Seungmun Pyo)

- Assisted preparing ITO glasses for synthesizing organic semi-conductors
- Synthesized PTCDI-C13 transistor / TIPS-Pentacene transistors / CL-PVP capacitors
- Analyzed output / mobility / on-off current ratio / thickness / leakage current of the synthesized semi-conductors

ADDITIONAL CAREER DEVELOPMENT

Undergraduate Research Office, CWRU | 05/2025 – 09/2025

Source-STEM 2025 Summer Research (Advisor: Clemens Burda, Hamza Shaili)

- Selected as a funded participant to conduct an individual research on desired program
- Synthesized bromide / chloride based Formamidine-rich nanocrystals with ligands
- Conducted comparisons between the ligands for enhanced stability of perovskites
- Formulated Formamidine Lead Bromide nano-platelets with altered emission peak
- Analyzed absorption / emission peaks and quantum yields of products

ACADEMIC ACTIVITIES

CWRU | 06/2025

Summer Undergraduate Research Showcase

Title: Optimization of Formamidine-rich perovskites via ligand passivation

Advisor: Clemens Burda, Hamza Shaili

PROPOSED RESEARCH

***needs confirmation through Hamza Shaili*

ADDITIONAL EXTRACURRICULAR ACTIVITIES

CWRU | 01/2024 - present

Performer in Klover (k-pop dance club)
